

# Welcome to EuroSun 2010!

EuroSun is Europe's largest conference on solar thermal energy. EuroSun conferences are organised biennially by ISES Europe and are dedicated to a scientific audience in the field of solar energy. Like EuroSun 2008 in Lisbon, EuroSun 2010 will be organised together with the IEA SHC program and will focus on solar heating, cooling and buildings.

Since the Lisbon conference, international business has been dominated by the world financial and economic crisis. However, the future-oriented solar thermal market has so far successfully resisted the crisis. R&D has led to many promising innovations and developments in fields such as the supply of heating for buildings, process heat and solar cooling. EuroSun 2010 will be an excellent platform for exchanging and discussing the latest R&D results, learning more about problems and their solutions, seeing old friends and meeting new ones.

**EuroSun 2010**  
28 September – 1 October 2010

28 September - 1 October 2010  
Graz, Austria

**Call for Papers**

## EuroSun 2010 – Call for Papers

The EuroSun 2010 scientific and organizing committee invites all interested scientists, engineers, students and researchers to present their latest R&D results and submit a 2-page, extended abstract by 1 February 2010 on any of the conference topics listed below.

After the reviewing process, the authors of selected abstracts will be asked to prepare a full paper and present their work at the conference. Please find all relevant information on the reviewing procedure and submission guidelines at [www.eurosun2010.org](http://www.eurosun2010.org).

We look forward to receiving your contributions!

Prof. Wolfgang Streicher  
Chair of the Scientific Committee

Werner Weiss  
Chair of the Organizing Committee

### Conference Topics

- Solar energy in architecture
- Net zero energy buildings
- Energy efficiency in buildings through solar applications
- Large-scale solar thermal applications
- Advanced solar domestic hot water heating
- Solar space heating with a high solar fraction
- Solar energy for industrial and commercial applications
- Solar cooling and air conditioning
- Solar collector technology
- Thermal energy storage
- Engineering and simulation tools
- Testing and certification
- Solar radiation and solar energy availability
- Other solar energy related topics
- Other components of solar thermal systems

For up-to-date information, please sign up for the conference newsletter on our website [www.eurosun2010.org](http://www.eurosun2010.org)

### Important Dates:

Deadline for Abstracts:	1 February 2010
Notification of Acceptance:	14 April 2010
End of Early Bird Discount:	29 June 2010
Deadline for Full Papers:	7 July 2010

**Deadline for Abstracts: 1 February 2010**
